**Subject:** Supplemental Email for SON Students regarding COVID Booster

Dear Linfield University School of Nursing Students:

The COVID-19 Emergency Response Team has been meeting weekly to review the rapidly changing state of COVID in our communities and on our campuses. We continue to work with the Oregon Health Authority and local health departments to examine the data and to recommend appropriate courses of action. Below is a message that was in the [Linfield Ahead](#) on Thursday, January 13. **Note the booster requirement, in particular.**

Within the School of Nursing, students are required to have the initial COVID vaccination as this is a requirement of clinical partners. We, as a School of Nursing, recognize it is only a matter of time before clinical partners require all nursing students in the state to receive a COVID booster dose.

The Complio COVID category is set up to upload COVID booster doses, although it is not yet required for compliance at clinical sites. We are asking students and faculty to receive and upload a COVID booster vaccine into Complio to meet Linfield requirements and prepare for clinical requirements in the future.

We encourage you to continue to read the [Linfield Ahead](#) when it is published on Monday and Thursday and to check the [COVID Web Site](#) if you have questions.

Be well and wash your hands,  
School of Nursing Deans' office, Director of Clinical Education and Student Life
