

Licensure Information: Program Completers in McMinnville School District (MSD)

Updated July 2023

The Linfield teacher preparation program (TEP) works closely with McMinnville School District where all Linfield TEP field experiences and most Linfield TEP student teaching placements occur. Many Linfield TEP program completers become teachers in the district. In order to track employment milestones, we decided to examine the types of licenses that Linfield program completers who teach in the district hold.

- We found that 75% of Linfield-prepared teachers working in McMinnville School District have progressed from the Preliminary Teaching License to the Professional Teaching License, Principal License, or Professional Administrator License. Our graduates are continuing to develop their professional skills to advanced levels after completing the Linfield TEP.
- Of the 22 Linfield TEP program completers at MSD who hold Preliminary Teaching Licenses, 19 (86%) are in their first 10 years of teaching. We expect that most of these graduates will go on to earn Professional Teaching Licenses.
- Four graduates hold administrator licenses. Two are elementary principals, one is a high school principal, one is a former high school principal (now serving at the district office).
